The foreign exchange market opene

from Priday's close.

The sale of a single lot of 500 shares of Goodrich preferred developed such a lack of demand that other selling orders quickly appeared, causing a decline of 4 points. The weakness attracted attention to the dividend outlook, because of the various interruptions to business during the fiscal year. Missouri Facific also developed weakness, declining 1 point, with the stock supplied by a firm , which has been noted as frequent sellers during the last two months. The weakness in those issues had an indicence on the trading all through the list, and fractional losses were suntained in some of the simportant stocks.

15. must be a pretty thoroughly liqui-diated market that disregards 10 per cent money and the announcement of the failure of a \$55,00,000 real estate concern, whose holdings are made up principally of choics New York property. Such a market with prices down to present levels does not offer much encouragement to selling—either short or longs. It looks as if the disciples of unrest were beginning to loss favor, and giving place to those who believe that security prices have discounted all the unfavor-able factors that have arisen and a few that have not.

High call money rates are restricting speculation of a bullish character and may continue te do so, especially as the Wilson message is expected to go to Congress early next week, when the Supreme Court reconvense.
